IV THERAPY AND DELIVERY SYSTEMS

INTRODUCTION

INFUSION THERAPY

In fluid and volume replacement therapy, the intravascular and/or extracellular fluid volume is treated with infusion solutions. In the case of threatening or existing fluid deficiencies due to cutaneous, enteral or renal losses, so-called crystalloid infusion solutions can be used to equalize an extracellular fluid deficiency.

The acute loss of intravascular fluids in particular can lead to life-threatening situations. In the case of acute volume loss, such as the loss of blood, colloidal infusion solutions can also be used in addition to crystalloid infusion solutions to replace the corresponding loss of intravascular volume.

From venipuncture to the actual infusion, all components are integral elements of an infusion system. Their interaction creates a system that promotes safe infusion therapy and B. Braun can partner with you in the fluid pathway.

IV CATHETERS

INTROCAN® SAFETY IV CANNULA

- Offers passive needle-stick injury prevention without modification in cannulation technique
- Automatic safety protection - self-activating clip technology covers needle tip automatically after use
- Ease of catheter advancement
- High flexibility of puncture angle
- Minimum effort for skin and vein penetration

Indication	Gauge Size x mm	Flow Rate (ml/min)	Box Qty	Article No.
Horse, Cattle, Foal	■ 14G x 50 mm	343	4 x 50 pcs	4251717-03
Calf	■ 16G x 50 mm	210	4 x 50 pcs	4251695-03
Short-legged, Large Dog	■ 18G x 32 mm	103	4 x 50 pcs	4251687-03
High volume fluid resuscitation in dogs	■ 18G x 45 mm	96	4 x 50 pcs	4251679-03
Standard Dog	■ 20G x 32 mm	61	4 x 50 pcs	4251644-03
Cat, small Dog	■ 22G x 25 mm	36	4 x 50 pcs	4251628-03
Rabbit, Puppy, Ferret	■ 24G x 19 mm	22	4 x 50 pcs	4251601-03

INTROCAN® CERTO IV CANNULA

- Designed for single handed puncture technique
- Atraumatic catheter tip
- Highly transparent flashback chamber
- The ease of use and increased flexibility of polyurethane reduces the risk of catheter displacement caused by animal movement.

Indication	Gauge Size	Flow Rate (ml/ min)	Box Qty	Article No.
Horse, Cattle, Foal	■ 14G x 50mm	345	4 x 50 pcs	4251369
Calf	■ 16G x 50mm	210	4 x 50pcs	4251350

Standard Dog	■ 20G x 32mm	60	4 x 50pcs	4251326
Cat, small Dog	■ 22G x 25mm	35	4 x 50pcs	4251318
Rabbit, Puppy, Ferret	■ 24G x 19mm	22	4 x 50pcs	4251300

VASOVET® WINGED IV CANNULA

Veterinary Bevel

- New and unique bevel shape, guarantees sharpness with every puncture angle (10° - 45°).
- VasoVet® displays consistent puncture behaviour irrespective of whether a deep (V. jugularis) or superficial (V. saphena, V. auricularis) vein is punctured. VasoVet® therefore perfectly adapts to the various situations in veterinary medicine.

Indication	Gauge	Flow Rate (ml/min)	Article No.
Horse, Cattle, Foal	■ 14G x 100 mm	275	4269226
Calf	■ 14G x 50 mm	343	4269228
High volume fluid resuscitation in dogs	■ 18G x 45 mm	96	4269138
Short-legged, Large Dog	■ 18G x 32 mm	103	4269355
Standard Dog	■ 20G x 32 mm	61	4269115
Short-legged Dog, Cat	■ 20G x 25 mm	65	4269219
Cat, small Dog	■ 22G x 25 mm	36	4269102
Rabbit, Puppy, Ferret	■ 24G x 19 mm	22	4269075

VENOFIX® SCALP VEIN

- The flexible interlocking wings and the micro siliconised precision bevel allow an appropriate puncture angle for various venous conditions. Soft wings facilitate a safe fixation on the patient's skin.
- Enhanced short-term infusion therapy
- The DEHP-free tubing prevents from kinking to avoid an interruption of infusion therapy.
- Venofix® A is appropriate for modern infusion therapy in connection with pressure infusion equipment, as it meets the requirements of ISO 8536-9.

GELOFUSINE®

Gelofusine® is a colloidal volume replacement fluid based on 4% modified fluid gelatin. Several decades of experience in the production and use of modified fluid gelatins positions B. Braun as an excellent partner in the field of volume replacement solutions.

- 100% blood volume expanding effect
- No dose limit
- Long shelf life, stored at room temperature
- Re-sealable ports

Description	Size (ml)	Box Qty	Article No.
Succinylated gelatin* (modified fluid gelatin)	500	10	FV41513

* Refer to brochure for technical specifications (MD8006)

FLUID PATHWAY

DISCOFIX® 3-WAY TAPS

- Suitable for all pressure infusions <4 bar
- Continuous straight flow channels for accurate pressure monitoring
- Directional arrows
- Lipid resistant - does not crack

Description	Box Qty	Article No.
Discofix® C Blue	200	16494C
Discofix® C Red	200	4095120
Discofix® C manifold	50	16605C

COMBI® CAP

Combi® Caps

- Dual function cap with male and female end
- Can be used for re-capping syringe or extension tubing/giving set or any application where a cap is required

Instopper Closing Cone

Designed to close any fluid pathway while allowing needle access through the membrane

- Luer lock connector
- Intermittent injection site
- Compressed injection membrane for needle access
- Yellow for visibility

Description	Box Qty	Article No.
Combi® Cap Blue	1000	4495152
Combi® Cap Red	1000	4495101
Combi® Cap White	100	4495209
Instopper Closing Cone	1000	4238010

STERIFIX® FILTER STRAW

Filter straw for withdrawal and filtration of fluids from large ampoules.

- Particle filtration of 5 µm
- Luer lock connector

Size	Box Qty	Article No.
5 µm, 10cm	100	415020

CARESITE® INJECTION PORT

SWABABLE VALVE

415122

470100

- Acceptable for use with high-pressure power injectors
- Open fluid path design to minimise areas where bacteria can collect
- MRI compatible
- PVC-free
- DEHP-free
- Lipid compatible
- Latex free

470108

470106

Product Data - Caresite® Port

Flow Rate	Up to 208 ml/min
Luer slip and Luer lock	Yes
Pressure Rating	300 PSI @ 10ml/sec
Priming Volume	0.22 ml
Positive Fluid Displacement	0.03 ml (positive)
Number of accesses	216

Description	Priming Volume	Box Qty	Article No.

2x Caresite® Small bore Y-extension tubing Spin lock x 15cm	0.90 ml	50	470106

HEIDELBERG EXTENSION TUBING

Article No. 471954

Heidelberg Extension Tubing

Standard bore tubing

- Inside tubing diameter 3.0mm, outside tubing diameter 4.1mm
- Luer Lock Connector
- Slide clamp (not shown in image)

Minimum Volume Extension Tubing

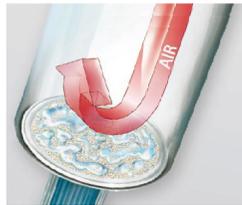

- Leur lock connection
- Ideal for use with Perfusor® compact S and Perfusor® Space

Description	Length (cm)	Priming Volume	Box Qty	Article No.
Standard bore tubing				
Heidelberg tubing	10	-	100	4033019

INFUSOMAT® LINE SETS: UNIQUE SAFESET TECHNOLOGY

REDUCE NUISANCE AIR ALARMS...

Hydrophilic membrane stops air

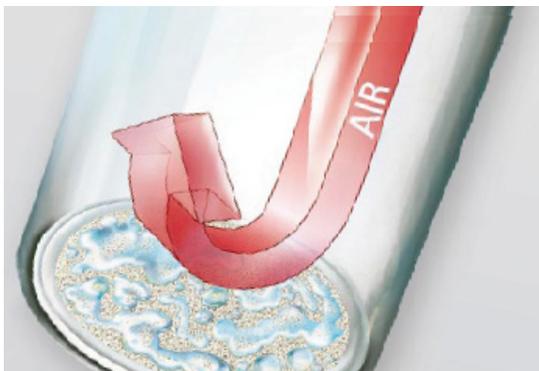

Prevents Air in Line

Hydrophobic membrane stops fluid

Eliminates Priming Spillage

The innovative AirStop helps prevent air infusion, and won't let the line run dry

When the container is empty, AirStop maintains a constant fluid level and no air can get through to the patient. The filter has the two advantages, a unique airtight filter membrane acts as a barrier, protecting against air infusion while retaining particulate matter 15 µm and below. Thanks to AirStop, switching over to fluids container requires less manipulations like opening the circuit, risk free respiking, less stress, and therefore more calm environment in the clinics..

Protective cap

A new protective cap lined with a hydrophobic membrane stops fluid leaking and protects against contamination.

PrimeStop

PrimeStop automates priming and ends messy dripping

- PrimeStop ensures that the line fills automatically.
- No more infusion fluid drips on hands, floor or bedding.
- Now you can prepare several infusions at once, quicker and more hygienic than ever before.
- PrimeStop maintains a closed system until connected to the patient.
- Effective contamination prevention.

INTRAFIX® PRIMELINE

CHOICES THAT ENHANCE THE OVERALL FUNCTION OF IV ADMINISTRATION

You can choose from a variety of add-ons e.g. that automate priming, make parallel pressure and gravity infusions safer, simplify injection and piggybacking procedures and many more.

Eurofix® Injection Site with handy, safe grip plate

Ensures secure drug injection and piggybacking with its latex-free, resealable port. Air-free priming.

Caresite® capless injection valve

Offers convenient and safe needle-free access for injection, aspiration or parallel infusions as a closed system, Latex free

Infuvalve® Back Check Valve prevents backflow

More safety during parallel pressure and gravity infusions. No blood reflux, Latex-free.

Discofix® C Stopcock, drug resistant

For convenient needle-free injection, aspiration or parallel infusion.

Luer-Lock connector with PrimeStop Cap

Automatic priming, prevents fluid from dripping out, closed system until connected to the patient.

Transparent UV protection

Tubing and drip chamber with transparent light protection to recognize residual air in the tubing and drips in the drip chamber with normal eyesight.

INTRAFIX® PRIMELINE ADMINISTRATION SETS

Intrafix® Primeline – Reliable quality, established in practice

The universal practicality of the Intrafix® IV set line has been proven billions of times worldwide. User-friendly designed core elements like the drip chamber and roller clamp enable secure gripping and easy handling.

Description	Gravity / Pressure	Injection Port	Box Qty	Length (cm)	Article No.
Intrafix® Primeline	Gravity	Y site	100	180	4062181
Intrafix® Primeline	Pressure	Grip Plate	100	180	4062182

INTRAFIX® WITH EXADROP® FLUID ADMINISTRATION SETS

Solution administration set for gravity infusion with dial-a-dose control.

- Easy flow rate selection (ml/h)
- Maintains and delivers selected flow rate (ml/h)
- Bacteria proof air inlet with snap vent for pressure equalisation
- 180cm tubing length
- 15 micron filter
- Australian Standard piercing spike
- Slide clamp
- Safesite® injection port*

Description	Box Qty	Article No.
Intrafix® Air with Exadrop® with Safsite®	50	4050183

SANGOFIX® ES BLOOD/SOLUTION DELIVERY SET

Sangofix® Blood/Solution administration set for gravity infusion

- 180cm tubing length
- 20 drops per ml
- 200 micron, 32cm² filter
- Australian Standard piercing spike
- Roller clamp for flow control
- Swivel lock connection

Description	Box Qty	Length (cm)	Article No.
Sangofix® ES with needle access with Y-site	80	180	4100514
Sangofix® ES with Safsite®	80	180	4051998
Sangofix® ES with Safeflow	80	180	4051998H
Sangofix® with Safesite®	100	180	4052218
Sangofix® with Caresite®	100	180	4052218H

DOSIFIX® VOLUME CONTROL BURETTE FOR GRAVITY INFUSION (SOLUTION)

Dosifix® is a volume control burette for gravity infusion.

- 160cm tubing length
- 60 drops per ml
- Calibrated 150ml burette
- Australian Standard piercing spike
- Roller clamp for flow control
- Swivel lock connection
- Hanger to raise height of burette
- Automatic shut-off swim valve to prevent air in line and risk of air embolism

With needle-free access:

- With valve access to burette chamber and tubing for injection
- With Safeflow for injection into burette and tubing

Description	Box Qty	Article No.
Dosifix® Volume Control Burette with Safsite®	25	4054504
Dosifix® Burette only with Safsite®	25	4055594
Dosifix® Burette with Safeflow®	25	4055594H

PHARMACY ACCESSORIES

FOR DRUG ADMIXTURE AND DELIVERY

Ecoflac® Mix
Needle-free admixture tool designed to be used in conjunction with Ecoflac® plus.

- Needle-free drug reconstitution
- Ideal for cytotoxic solutions

Ecopin
The original tamper-proof seal for the injection port after drug admixture to be used in conjunction with Ecoflac® plus.

- Dedicated design prevents further manipulation of the used port system

Injection Filter

- For use between the syringe and I.V fluid line
- For the reduction of microbial and particle contamination
- Luer Lock fitting

Mini-Spike®
Vented Dispensing Pin for injecting and withdrawing fluids from vials to be used in conjunction with Ecoflac® plus.

- Reduces risk of contamination
- Integrated 0.45 um air filter
- Swabale access valve
- Accepts luer lock or luer slip syringes

Transofix®
Needle-free admixture tool designed to be used in conjunction with Ecoflac® plus.

- Mobile irrigation device delivering high volume jetstream
- Transferring contents between containers

Micropin
Needle-free admixture tool designed to be used in conjunction with Ecoflac® plus.

- Needle-free access container
- Eliminates needle-stick injury

Description	Box Qty	Article No.
Ecoflac® Mix	250	16401

INJECTION

STERICAN®

STERILE HYPODERMIC NEEDLES

Single-use needle for subcutaneous, intramuscular, intravenous and intra-arterial injections

- 3-facet bevel for minimal pain upon puncture with short /long bevel according to the indication
- Thin-walled needle: made of stainless, chromium-nickel steel with extremely smooth surface with light silicone coating
- Latex-free / PVC-free
- Individually sterile packed, in dispenser boxes containing 20 practical packages with 5 pcs

Description	Gauge Size	Length (inch)	Length (mm)	Box Qty	Article No.

STERICAN® FOR SPECIAL INDICATIONS

Single -use needles for special indications

- 3-facet bevel for minimal pain upon puncture with short/long bevel according to the indication.
- Transparent Luer-Lock fitting made of Polypropylene
- Easier identification through colour-coded hub conforms to ISO 6009
- Thin-walled needle: made of stainless, chromium-nickel steel with extremely smooth surface with light silicone coating
- Latex-free / PVC free
- Individually sterile packed, in dispenser boxes containing 20 practical packages with 5 pieces

INJEKT®

Extended graduation

- Allows for exact dosage beyond the nominal volume

Nominal volume	Usable up to
2 ml	3 ml
5 ml	6 ml
10 ml	12 ml
20 ml	24 ml

High barrel transparency

- Simplifies inspection of the syringe's content

Green plunger

- For easy recognition of the filling volume

Black graduation

- For ideal contrast and readability

Smooth and steady plunger action

- Latex-free
- Silicone-free
- Ideal for use in fields of artificial insemination and semen transfer

OMNIFIX

- Hypodermic Syringes for single use.
- Sizes 2 - 50ml
- Made of Polypropylene/Polyisoprene
- Highly transparent barrel
- High contrast black graduation
- Permanent marking
- Safe plunger backstop
- Piston with double sealing ring for slow aspiration and injection
- Latex-free
- According to ISO 7886-1
- Box of 100 pcs

OMNICAN® GENTLE

- Large, easy to read scale for an exact dosage
- Protective caps at the ends of the syringe guarantee its stability
- The crystal clear barrel of the syringe makes sure that air bubbles are easily identified
- Piston with double sealing ring
- Round shaped cylinder with black scale
- Materials: PP, PS, IR, PE, stainless steel, Silicone oil
- Latex-free, PVC-free, DEHP-free
- Product standard: EN ISO 8537

AUTOMATED INFUSION SYSTEMS

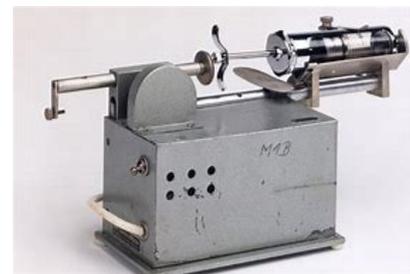

With the involvement of Dr. Hess' in 1951, B. Braun introduced the first mechanical syringe pump on the market - the Perfusor®. Today, with more than 65 years of experience, B. Braun has introduced a fully modular system that has quickly become a benchmark in automated infusion technology for the Australian Veterinary market.

B. Braun Space is smart, simple, flexible, safe and affordable. Whether a standalone infusion device or a fully networkable ICU station is required, the modularity of Space can be achieved by matching hardware and software capabilities.

The option is yours to meet your clinical requirements.

Key delivery capabilities:

- Colloids and whole blood (validation available)
- Crystalloids
- Cytotoxic and light sensitive
- Enteral nutrition

First pump created in 1951 By Dr. Hess

STAND-ALONE OR MODULAR INFUSION SYSTEM

Manufactured in Melsungen, Germany, the TGA registered Perfusor®, Infusomat® Space and Infusomat® Space P are one of our smallest, lightest and safest infusion devices offering a broad range of functionality as standard, all with a 2 year warranty.

Infusomat Space IV Pump Dedicated Lines

- High delivery accuracy
- Validated for colloids
- ARTG* number 114011

Infusomat Space P IV Pump Generic Lines

- Lower running costs
- Lower capital investment
- ARTG* number 114011

Perfusor Space - Syringe Drug Library

- Accepts 2ml – 60ml Syringes
- Standard Drug Library available on request**
- ARTG* number 116814

Handling and characteristics

Compact and robust
Externally accessible battery
Pole mount doubles as carry handle
Highly modular, MRI compatible case available
Networkable

Operation

Adjustable alarm volumes
Adjustable occlusion pressure
Alter Infusion parameters on the fly
Standardised operation/data input across all models
WiFi Batteries available

Investment protection

Upgradable software
Battery maintenance mode
5 year warranty on batteries
Service centre in Sydney***
Remote monitoring possible

*Australian Register of Therapeutic Goods, **DL Personalisation is available, ***Service agreements are available

VOLUMETRIC AND SYRINGE INFUSION PUMPS

INFUSOMAT® SPACE AND PERFUSOR® SPACE. TWO PUMP TYPES – ONE CONCEPT

Smaller, lighter and safer to handle than any comparable system; Infusomat® Space® and Perfusor® Space continue to set the standards in infusion technology.

The user interface for both pump types is identical. This uniformity lowers costs for medical and technical training, streamlines workflow and raises safety standards.

Simplicity and safety are standardised.

Core System Features

- Locking/unlocking mechanism
- Guide slots

- Up to three pumps can be stacked on top of each other and locked together

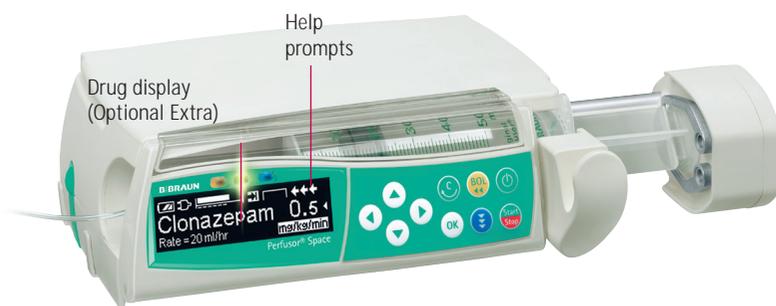

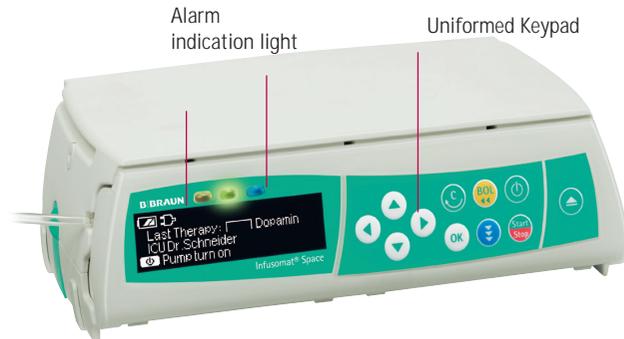

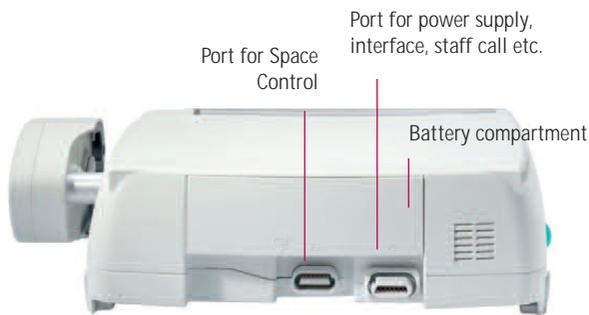

- Pole clamp allows horizontal and vertical mounting of up to three separate pumps

- Carrying handle integrated in the pole clamp

- Lighted keypad and display
- Totally networkable

Uniform rechargeable battery pack WiFi or Standard

INFUSOMAT® SPACE

DEDICATED B. BRAUN LINES

Infusomat® Space features double the protection, with two anti-free flow clamps. One within the pump and another directly on the Infusomat® Space-Line.

Free flow is reliably prevented even if the roller clamp is not closed before removing the line.

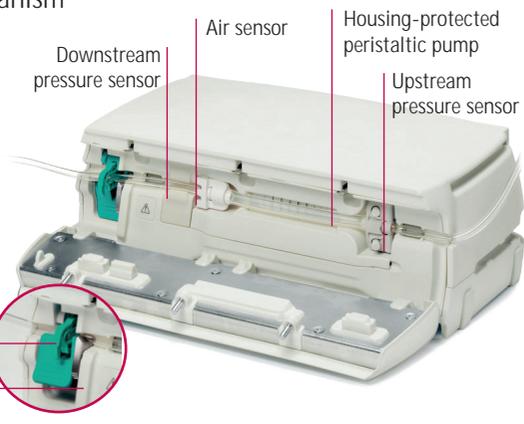

- Macro mode: Adapt the display screen size
- Help prompts: Operating instructions display in brief
- Alarm volume settings: Adjust the volume of the audible alarm as required
- Data lock: Protects against unauthorised tampering
- Customisable drug library options available

Anti-free flow clamp built into set and pump and removal mechanism

Front cover with motorised closing mechanism

The Peristaltic cover can be removed for cleaning

Anti-free flow-clamp built into set
 Anti-free flow-clamp built into pump
 Removal mechanism

Technical Data - Volumetric Infusion Pump

Classification	Defibrillation-proof, CF type, class II protection rating, in compliance with IEC/EN 60601-1 Class IIb in compliance with Council Directive 93/42/EEC	Battery	NiMH 4 hours at 100ml/h 6 hours full recharge
Moisture Protection	IP 22 (drip protected for horizontal usage)	Accuracy of set delivery rate	± 5% over 96 h With original Infusomat® Space-Line
EMC	IEC/EN 60601-1-2, IEC/EN 60601-2-24, EN 55011	Bolus delivery	Delivery rate 1 - 1200 ml/h Max. Bolus volume 99.99 ml - Bolus on demand - Bolus with volume/dose preselection - Bolus over time (1 min - 24 h)
Operating conditions	+10 ... + 40°C	Volume preselection	0.1 - 9999 ml 0.1 - 99.99 ml in 0.01 ml increments 100.0 - 999.0 ml in 0.1 ml increments 1000 - 9999 ml in 1 ml increments
Size	214x68x124 mm (WxHxD),	Time preselection	00:01 - 99 h 59 min
Weight	approx. 1.4 kg	Rate calculation	Automatic rate calculating volume over time or by dose
Approved disposables	Original Infusomat® Space-Line		

Description	Box Qty	Article No.
Infusomat® Space (Dedicated Set)	1	8713050

INFUSOMAT® SPACE P

HIGH PERFORMANCE INFUSION PUMP FOR STANDARD INFUSION LINES

Infusomat® Space P has a lower capital cost. By accepting most generic giving sets, you have freedom to control your consumables. B. Braun always recommends the use of TGA registered consumables.

- Calibrated for use with most generic giving sets.
- Automatic rate calculation by calculating volume over time
- Automatic calculation of delivery rate in ml/h based on the entry of drug concentration in conjunction with the desired dose rate (e.g.: ml/kg/min)

Drug Library capabilities:

- Up to 720 drug names including therapy data and information can be stored in 15 categories
- Drug specific soft and hard limits as well as default values can be specified

PERFUSOR® SPACE

CHANGING SYRINGES IS NOW MORE CONVENIENT AND SAFER THAN EVER BEFORE

The innovative drive technology of Perfusor® Space not only ensures excellent start up and delivery properties, but also delivers safety and unique convenience when changing syringes.

Automatic function synchronisation prevents handling mistakes during syringe change.

A piston brake prevents free-flow of the syringe and eliminates micro boluses.

■ Syringe holder with integrated plunger stop

■ Automatic syringe mount
■ Drive head made of impact-resistant material

■ Syringe lighting and magnification effect

- Extremely robust and hardy
- Simple and accurate data entry
- Delivers precise volumes and rates
- Includes default drug library
- Accepts syringes from 2ml to 60ml

Technical Data - Syringe Driver

Classification	Defibrillation-proof, CF type, class II protection rating, in compliance with IEC/EN 60601-1 Class IIb in compliance with Council Directive 93/42/EEC	Battery	NiMH 8 hours at 25ml/h 6 hours full recharge

SPACESTATION WITH COMM'S

Our Space Station with comm's gives you the ability to operate and charge 4 pumps at one time, but also becomes an interface to upgrade drug libraries, software and new features such as Data lock, PCA (Controlled Analgesic), Occluguard (Low pressure device alarm for the Perfusor Space). In an ICU setting, the SpaceStation centralises devices and minimises the hardware footprint.

SpaceCom is used to connect external devices for the data documentation in a Patient Data Management System, PC or USB memory stick.

Advantages

- Can connect 6 Space Stations to hold 24 pumps
- Data communication interface for up to 24 pumps can be optionally integrated into a SpaceStation
- Interfaces: Ethernet, RS 232, USB for barcode reader and storage devices, wireless LAN
- All conventional interfaces are available for linking B. Braun Space systems to the hospital network or to an external Clinical Information System
- For use with any standard Internet browser to access infusion data, medical histories, or the servicing information of all Space workstations connected to the network.

SpaceStation, SpaceCover and SpaceCom

The diagram shows a white SpaceStation unit with four pump slots. A callout shows a close-up of the audiovisual status indicator. Another callout shows the SpaceCom interface panel with various ports. The unit is shown in a stack of three.

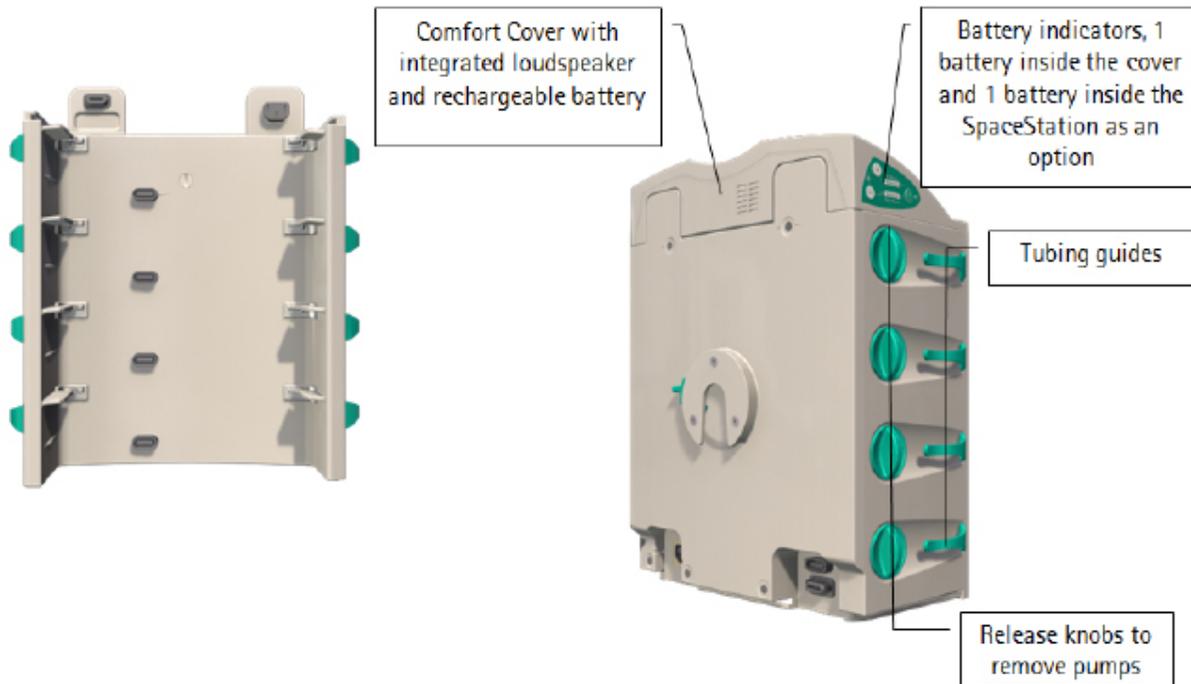

- Audiovisual status indicator
- tool-free assembly
- Quick "click-in" of pumps
- Every pump type fits in every slot
- Removal does not affect other pumps
- Integration in staff-call systems

- Compact Flash Card for Wireless LAN
- Ethernet RJ45
- PS/2 for barcode
- RS232
- USB Slave Port
- USB-Master port

- Up to 6 SpaceStations / bed
- Up to 24 pumps / bed
- Up to 3 pillars / bed

Description	Box Qty	Article No.
SpaceStation with comm's	1	8713142
SpaceCom Retrofitting kit	1	8713160

SPACESTATION STANDARD

Our Standard SpaceStation can be used for charging your pumps in any configuration and gives you a clean tidy work flow. In an ICU setting, the SpaceStation centralises devices and minimises the hardware footprint.

- Multi Space charging Station
- 4 pumps, one power supply
- Each SpaceStation is rated to hold 6 pumps in any configuration with only 4 pumps actively charging.
- Space-saving solutions improve workplace ergonomics
- Portable with a quick release from the pole clamp
- Tubing holders to keep lines tidy
- Can connect 6 SpaceStations to hold 24 pumps

Description	Box Qty	Article No.
SpaceStation Standard	1	8713140

SPACECOVER OPTIONS

- The SpaceCover Standard with integrated carrying handle converts the B. Braun SpaceStation into a portable unit.
- The SpaceCover Comfort acts as the communication display for all Space Pumps inserted in the SpaceStation. The integrated visual and audible alarms of the SpaceCover Comfort centrally identify the status of the Space infusion devices, with alarm and pre-alarm conditions

Description	Box Qty	Article No.
SpaceCover Standard	1	8713147
SpaceCover Comfort	1	8713145

SPACESTATION MRI

SpaceStation MRI shields the pumps against magnetic fields and thereby ensures interference-free images.

When Space infusion pumps are used, special treatments like TCI can be given during MRI examinations.

Performance Data

- Shielded aluminium housing (RAL 9002)
- Dimensions: HxWxD: 375 mm x 450 mm x 311 mm without trolley
- Dimensions: HxWxD: 1350 mm x 656 mm x 600 mm when mounted on trolley

Description	Box Qty	Article No.
SpaceStation MRI	1	8713152

WIFI BATTERY

Battery-Pack SP With WiFi on board allows you to operate stand alone pumps in modern IT infrastructure.

- Inbound and outbound data communication protocols support the integration into modern workflow concepts within the hospital.
- In combination with the B. Braun Online Suite, You will be able to upload drug libraries wirelessly
- Monitor all connected pumps from one location with in the hospital or login remotely to check your patients pump

Battery module:
Lithium Ion battery cell

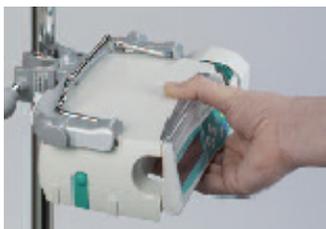

Description	Box Qty	Article No.
WiFi NiMh Battery	1	8713182A
Standard NiMh Battery	1	8713180A

POLE CLAMP

Space Pole Clamp will rotate 360° and lock into place in 45° angles, allowing you to clamp to horizontal or vertical poles

- Line pump up with the Pole clamp guide rails.
- Slide pump fully into place onto the guide rails.
- An audible "Click" should heard.
- Test the pump is secure.

The pump is now securely attached to the Pole Clamp.

- Do not lean on the pump when attached to the Pole Clamp.
- Do not position the pump unit above the patient.

To release the pump from the Pole Clamp

- Hold pump in one hand and with the other push down on the silver handle and press the white clip at the back of the bracket, this will release the pump
- Pull the pump forward and remove

Description	Box Qty	Article No.
Pole Clamp	1	34251151

COMBI LEAD

The Combi lead will allow you to connect and charge 3 Space units in any configuration, using one power supply cord.

Description	Box Qty	Article No.
Combi Lead	1	8713133

CAR POWER SUPPLY (12 V)

The car adaption cable is designed to allow for patient transport without disruption to power supply.

- Plugs into a 12v power supply
- Converts the power to adapt to the Space units.

Description	Box Qty	Article No.
Car power supply	1	8713231

PCA KIT

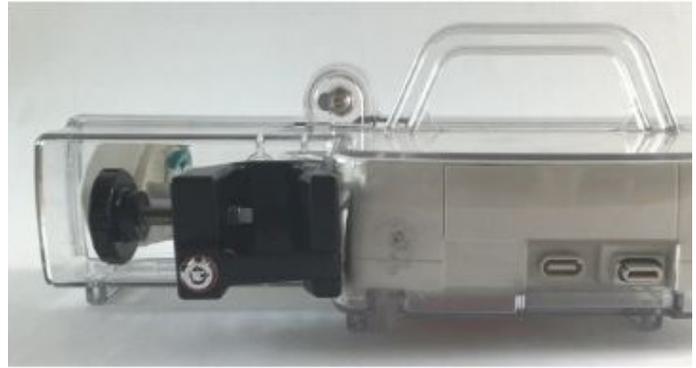

- PCA is a Programmed Controlled Analgesia*, that will allow the Nurse or Vet to deliver a pre-set bolus of medication to the patient.
- Data lock can also be engaged to stop tampering or change of dose rate
- With the use of standby mode you can set a timed reminder for when your patients next dose is due.
- One push dose delivery

* we considered calling it "Paw Controlled Analgesia", but we decided "Programmed" was more appropriate

Description	Box Qty	Article No.
PCA Kit	1	8713554

PCA LOCK BOX

- The PCA Lock Box is designed to encase the Perfusor Space unit for security.
- With the Perfusor Space locked inside the case, tampering or removal of a syringe will not be possible.
- The PCA Lock Box can be securely locked to an I.V stand for security.

Description	Box Qty	Article No.
PCA Lock Box	1	8713557

SYRINGE ANTI REMOVAL CAP

The Syringe Anti Removal Cap is placed over the drive head from the front and is fixed with the PCA-key (270° clockwise rotation). This stops syringes being tampered with or being removed.

Caution: When Syringe Anti Removal Cap is used, always change the syringe as soon as the "syringe empty" alarm appears.

Description	Box Qty	Article No.
Syringe anti removal cap	1	8713556

CUSTOM I.V STAND

B. Braun's Custom I.V stand is sturdy enough to hold up to 6 fluid pumps with 4 being housed in our SpaceStation unit.

The I.V pole stands at 101" (256cm) fully extended and 75" (190cm) compressed

- With 5 Stainless steel hooks to accommodate any combination of fluid bags or bottles
- Six legged heavyweight base 22" Diameter (56cm) with an off white epoxy finish
- 6 soft rubber 3" (7.60cm) ball bearing casters
- Telescoping stainless steel I.V pole with a slow descending inner pole.
- The high quality construction, premium wheels and lower centre of gravity makes this a logical choice to house your Space devices

Description	Box Qty	Article No.
Custom I.V Stand 6 legs	1	N7516

ENOUGH ABOUT HARDWARE, WHAT ELSE CAN SPACE DO!

Functions	
KVO (Keep Vein Open)	When a therapy ends, KVO activates and the low-flow rate ensures the vein doesn't occlude.
Blood, Solution, Nutrition	Infusomat Space has validation to deliver Blood products, Solutions or Enteral Nutrition.
Drug Library	Perfusor Space is equipped with a Veterinary default Drug Library that includes 14 common medications used in Veterinary Medicine. If you want to customise your own, let us know - we're flexible.
Networking	Through the use of the WiFi battery or SpaceStation with Comm's, Space can connect to your LAN and you can monitor infusions remotely, in real time.
TCI (Target Controlled Infusion)	Space has in-built algorithms that allows you to deliver a bolus followed by a continued rate to effect.
CRI (Constant Rate Infusion)	Space' on board dose rate calculator allows continuous low-dose administration, based on dose per body weight over time.
PCA (Programmed Controlled Analgesia)	With the PCA Kit attached, the clinical team can pre-program a therapy of a medication and administer the desired dose at the click of a button. A holding period is then activated until the next dose can be delivered.
TOM (Take Over Mode)	Takeover Mode automatically starts the second pump as soon as the first pump finishes its therapy. SpaceStation with Comms is required to allow pump-to-pump communication.
Occluguard	Occluguard is a Smart Alarm that automatically adapts to any infusion, pre-alerting the clinician to occlusions, closed valves, blocked filters, kinked lines and syringe effects.
Data Lock	Data lock allows the administrator to lock down a pump to avoid inadvertent or unwanted adjustments to a therapy. There are 3 levels of data lock, each level with increasing restrictions. All levels require a passcode to make any changes.
Stand By Mode	Allows the administrator to set a therapy in advance, up to 24 hours. The time can also be set as required and act as a reminder alarm, so if it gets busy, you don't forget.
Battery Maintenance	Battery maintenance mode periodically discharges, calibrates and recharges the battery therefore extending the battery working life and displaying accurate remaining run times.
